# CHRS Fluid Navigation Overview

This article covers the basics of the fluid navigation in PeopleSoft Human Resources/CHRS.

Fluid navigation and mobile devices

Fluid navigation uses the the latest technology (HTML5, JavaScript, CSS3) to enable Titan Online fluid pages to scale gracefully from large screen devices such as desktops to the reduced viewing space of smartphones and tablets.

This means that the way you navigate stays consistent across devices, making it easier to access your Human Resources functionality from any device.
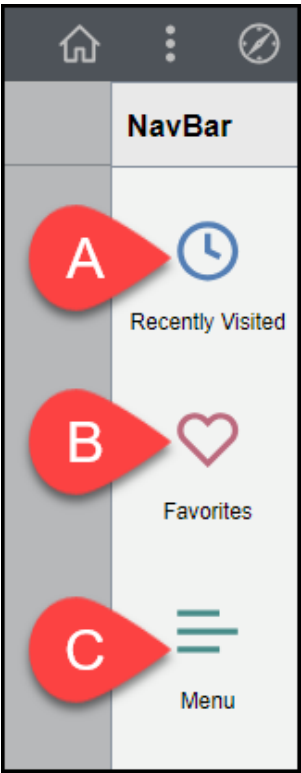

CHRS Navigation

Using the NavBar

NavBar Options

Letter in Image Above	Name	Action
A	Recently Visited	View the recent menus that you have accessed
B	Favorites	View or edit pages or menus that you have added as favorites; an advantage of favorites is that you can give them a customized name (e.g., "CSU TAE Appointment Data Entry" can be saved as a favorite called "Create PTF Appointments").
C	Menu	Allows you to access all of the functionality that you have permission to
